

ABDOMINAL  
REINFORCEMENT  
NET WITH  
"SHAPE MEMORY"

**MESH**

**SURGIMESH**®

# SURGIMESH®

## ABDOMINAL REINFORCEMENT NET

FOR INGUINAL HERNIAS AND RUPTURES

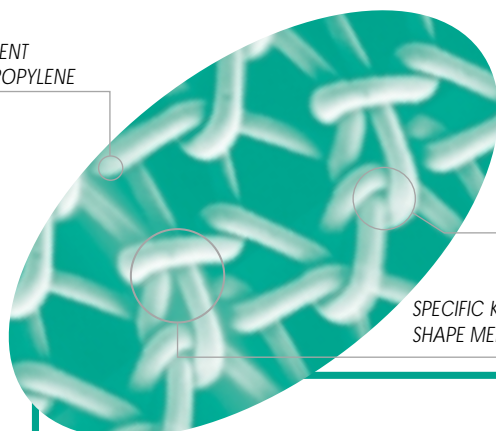

NON-REUSABLE

Made from extruded monofilament polypropylene fibre : SURGIMESH® is a knitted, run-resistant, transparent and non-resorbable net, containing **no materials of animal or human origin**, suitable for the following applications : hernias and ruptures by laparotomy or laparoscopy route, rectal and genito-urinary prolapse. SurgiMesh® has been especially designed with a framework that offers a

resistant structure much appreciated by practitioners.

MONOFILAMENT  
100% POLYPROPYLENE

FLEXIBLE OPEN-STITCH KNIT  
MAKE THE IMPLANT POROUS  
FOR GOOD COLONIZATION  
(FOR GOOD SITE DRAINAGE)

SPECIFIC KNIT WITH  
SHAPE MEMORY

### PROPERTIES

Composition : 100% polypropylene. High physical characteristics, excellent mechanical resistance over time, chemical inertia (biocompatibility), apyrogenic, lower specific gravity (85 g/m<sup>3</sup>), elasticity and extensibility (bi-directional), flexible mesh.

### CHARACTERISTICS

Insensitive to damp : hydrophobic material. Crystallinity level of 60%. Break resistance of net : 11 kg/cm<sup>2</sup>. The mechanical characteristics remain unchanged on implantation. Delivered in double Tyvek peel-off envelopes. Single use. These implants comply with the regulations defined in E.E.C. directive 93/42 on medical devices.

"FP" : means that the mesh has got a slot in the centre of the width and a hole

"FPD" : means that the mesh has got a slot and a hole but positioned off-centre

Special sizes on request.
